

**LIST OF SOME PRODUCTS INTRODUCED BY INDIVIDUALS IN NEW  
CALEDONIA NOT REQUIRING IMPORT PERMIT AND CERTIFICATE**

Photo: Ludivine Sariman

New Caledonia is free from numerous diseases and parasites affecting humans, animals and plants, which are present in other parts of the world. The New Caledonian's laws do take these particularities into account in order to maintain the exceptional status of the island.

Consequently, all animals, animal products or products from animal origin, plants, plant products, and minerals are to be declared when entering New Caledonia and must be covered by appropriate veterinary and/or phytosanitary certificate.

Some products may be imported by individuals without import permits and/or sanitary certificates. The list of products presented hereafter sums up these exemptions. This list can be modified anytime without warning following new sanitary information. In all cases these products may be declared or will be seized.

The limit is set to 5 kg per passenger or mail parcel.

The major piece of New Caledonia's legislation regulating the import of goods hereafter mentioned is the regulation n°2014-333/GNC dated 13<sup>th</sup> of February 2014.
